

D'Life HOME INTERIORS

An Online Interior Design Management System

Abstract

D' Life Interiors is an online Interior Design Management System developed for managing various interior designs. This project deals with managing interior designers and clients. The system keeps track of the latest interior designs, and client data and requirements. The system reduces lot of work for customers as well as owners. The main goal of developing this system is simply because the current system follows manual operations. Manual operations causes so many drawbacks. The main drawbacks are time consuming, it takes more effort and physical space to keep track of paper documents when mistakes are made or changes or corrections are needed, often a manual transaction must be completely redone rather than just updated. The aim of proposed system is to develop a system of improved facilities. The system provides proper security and reduces the manual work. The customers can place their orders and do transaction's online. The proposed system provides high security, high speed and greater efficiency.

In our proposed system admin can view user's requests, can add product designs. Admin can manage the system by deleting or updating or adding the products. Users can view the product categories which include designs according to their needs and they can making booking. User can also choose required designs within their budget. In this system searching can be optimized.
